WORK EXPERIENCE

Software Development Intern
Jul 2026 – Jan 2027

Lyre Softronics, Ambattur, Chennai — 6-month internship (ongoing)

- Build and maintain full-stack web applications with React.js, Node.js, Express.js and Laravel on production software.
- Design and maintain 5+ database schemas across MySQL and MongoDB, keeping data models consistent across modules.
- Integrate 10+ RESTful APIs and manage frontend-to-backend data flow to keep data accurate across all modules.
- Collaborate in a Git-based team on debugging, testing, deployment and maintainable software.

PROJECTS

Blog Website
Full-stack project

Tech Stack: Laravel, React, Inertia.js, PHP, MySQL, Tailwind CSS

- Built a full-stack blog platform for publishing and organizing articles, with a clean, responsive reading experience.
- Implemented blog management with categories, tags, readable slugs and image uploads.
- Added role-based permissions for Admin, Editor and Staff workflows, plus Markdown-style article formatting with tables and code examples.

Event Management Web Application
Jan 2025 – Feb 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, JavaScript

- Built a full-stack event platform with modules for event creation, calendar view and media upload for end-to-end lifecycle management.
- Designed MongoDB Atlas schemas across 4+ collections for events, users and media metadata.
- Developed 8+ REST APIs for CRUD operations and a dynamic React.js frontend with filters and calendar views.

Weather App with Alert Notifications
Final-year BCA project

Tech Stack: React, Node.js, Express.js, MongoDB

- Built a real-time weather application using the Weather.com API to show live conditions across multiple locations.
- Implemented user authentication and login for personalized, user-configurable weather alerts.
